HEADING THE FUTURE

Base

Pisa

Ideal location for development of advanced technologies, maintaining excellent links with local academia.

Headquarters

Pisa

Branch office

Rome

Established

2002

Core team with 20 years of experience in ICT, telecommunications, control & automation

R&D Expenditure

~20%

(out of 5.5 M€ turnover)The time gap between technological innovation and obsolescence is narrowing, so it's mandatory to invest in research and innovation

Since 2006, we have designed and developed an IoT platform under our own brands Symphony and Sealux.

The platform manages the infrastructure that allows the whole control and automation of smart facilities in complex technology environments, such as mega yachts, luxury villas and smart buildings. It supports a broad range of sensors, actuators and fieldbuses, implementing a rule-based control logic that interacts with a full custom Graphical User Interface.

Starting from that, we can design and implement a wide range of technology solutions totally tailor-made, integrating also the most cutting-edge components and solutions offered today in markets of home automation and audio-video.

All of this has been possible because R&D is in our roots. The know-how generated from our research and innovation activities has always enabled the constant upgrading of our products and the offer of consultancy services in IoT, system integration and networks.

Nextworks at a glance

MILESTONES

2002 Nextworks is Born

2004 First integrated system in the world on an IP network

2006

First installation of Best on a Yacht (Benetti BC 101)

2007

First integrated system on an IP network (BEST -Benetti Exclusive Sea Technology)

2010

First yacht in the world with iOS control

2014 Symphony

is born

2016 First Smart Building

Industry 4.0 partnership for Management system installation research projects funded by the EU

2021 2022

+200 systems installed

SOME OF OUR CLIENTS

COMPANY OVERVIEW

Focus on R&D

Thanks to the R&D department, Nextworks leverages a constantly evolving **ICT know-how** which is unique in the SME landscape, with high potential for easy turnaround into offerings of new innovative services and products.

Nextworks has a leading role in 5G/6G R&D in Europe with main contributions in design and standardisation of control, management and orchestration **solutions for 5G/6G networks** (with SDN, NFV, and edge computing) and Factories of the Future.

Highly specialised consultancy services and research and development activities.

63 projects in European research programme frameworks

5 projects in Regional/National research programmes

Ranked at top positions among SMEs (and beyond) for number of projects and funding received at National and European level

Efficiency, simplicity and flexibility

Sealux and Symphony were created to respond to a need for efficiency, simplicity and flexibility. A **universal and open platform** that, with the use of the most advanced technology standards, allows the **smooth integration of third-party products**.

COMFORT LIVING

Enjoy your environments, control your lighting, curtains and air conditioning easily and quickly

ENTERTAINMENT

The latest movies and TV shows, your favourite music artists, all at your fingertips on your controller

VIDEOSURVEILLANCE

Feel safe and protected with an all-around CCTV system

COMMUNICATION

Stay in touch with anyone, in a smart way

NETWORKING

Master bandwidth management to let the you enjoy internet at full speed

MARKET SECTORS

IMMERSIVE ENVIRONMENTS
Creative use of cutting-edge
audiovisual technology to make
a range of experiences and
bring many viewers into the
same simulation

YACHTING

With more than 160 Mega Yachts delivered, Nextworks is one of the top technology providers in Italy

BUILDINGS

A new approach to Technical Building Management: no more legacy automation systems or traditional supervisors.

VILLAS

Nextworks combines advanced technological concepts to create a living environment with its own distinct personality and appeal.

ASSISTED LIVING

Providing independent living, Nextworks system eases daily operations for those with disabilities.
